

OVERVIEW

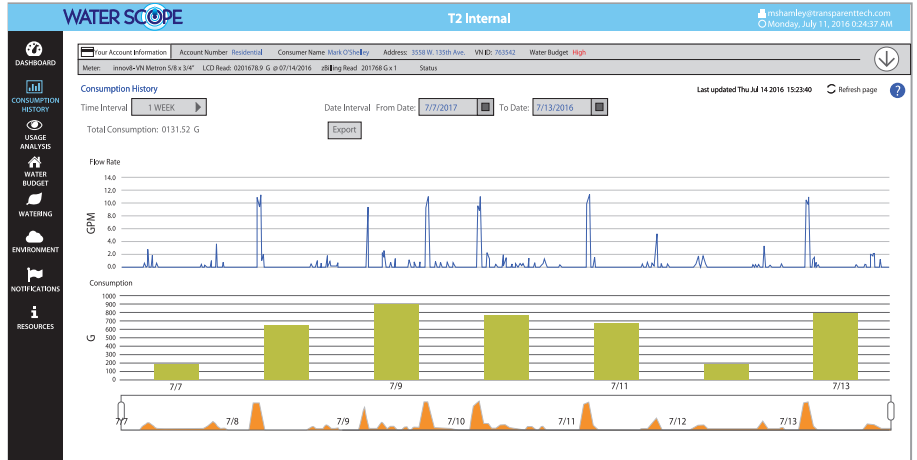

WATER SCOPE

Water Consumption Web Portal

Consumption History

The Consumption History page provides detailed charts to view historical consumption and flowrates. The charts show date up to the previous day's midnight. The top chart shows flowrate in gallons per minute. The lower chart shows consumption in your utility's measurement units (gallons or cubic feet). Controls at the top allow you to adjust the time span, and lower controls allows you to pan-zoom on the chart.

This function can show you when and how you are using water. It can show many events and conditions such as leaks, high-usage events, and outdoor watering.

Notifications

Waterscope gives you the option of email or text notifications upon the identification of common conditions such as leaks, intermittent leaks, high usage, and unexpected usage. It can also provide a summary of your water budget performance at the end of the cycle.

Verification	Set Notification	Unexpected Usage	Format
			Email
Condition			
Water Budget			
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Cycle Summary	<input type="radio"/>
Other			
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Leak (A drip or trickle leak is evident)	<input type="radio"/>
<input type="checkbox"/>	<input type="checkbox"/>	Intermittent Leak (Water is being used at a high flow for hours at a time)	<input type="radio"/>
<input type="checkbox"/>	<input type="checkbox"/>	High Usage (A high daily consumption of water is evident)	<input type="radio"/>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Unexpected Use (Unexpected water usage)	<input type="radio"/>
<p>! Emails will be sent during normal business hours. Time is subject to your time zone.</p>
